

REMARKS

This supplemental response is being filed in order to correct an obvious typographical error contained in Claim 5 of the response mailed on May 5, 2005. Specifically speaking, Claim 5 has been amended to properly state that the number average molecular weight of the cationic resin is from 1,000-50,000. Support for this amendment can be found on page 6, lines 12 and 13, of the present specification. No new matter has been added. Favorable consideration is respectfully solicited.

Respectfully submitted,

  
Terrylene F. Chapman
